

KEEP TEXAS RECYCLING PROJECT HIGHLIGHTS

The technical assistance project in the DFW region helped communities educate the public on contamination and improve efficiency.

With commodity prices low and outlets for material limited, KTR worked with communities in the Houston-Galveston area to find vendors and alternatives.

The Texas Rural Carton Recycling project worked to implement and explore carton recycling options for rural communities.

In 2018/2019, KTR visited and awarded 17 communities with 20-year achievement awards.
